

## **PENETRATION TESTING**

*REDUCE YOUR RISK EXPOSURE AND PROTECT YOURSELF*

### **Who are we?**

A group of highly driven experienced people providing a “One stop shop” for information security solutions and services to Government, commercial and domestic markets. The management team has over 50+ years' experience in the domain. The core team is committed to success driven by a passion to deliver value to the market and protecting mission and business critical infrastructure.

Suraksha penetration testing is conducted thoroughly for web, application, mobile, database, operating systems, servers, cloud services, software as a service and complete 360 degree visibility. Both black box (hacker's view) and white box (inside the network) will be conducted addressing all the areas of concern.

### **What do we offer?**

- **Penetration testing**
- Information Security Awareness and Training
- Governance, Risk and Compliance Management
- Information Security Audit
- Forensic Investigation
- Vulnerability Assessments
- Search and Find (Inappropriate material)

### **Why Penetration Testing?**

**Penetration testing** is one of the most sought after service that ensures the safety of sensitive and proactive protection to your IT investments.

**CURRENT SECURITY POSTURE**

**SEVERITY DISTRIBUTION**

**DOMAIN WISE SEVERITY  
DISTRIBUTION**

**OVERVIEW OF FINDINGS**

**INTERNAL PENETRATION TESTING**

**EXTERNAL PENETRATION TESTING**

**CYBER ATTACK ASSESSMENT**

**CYBER ATTACK SIMULATION**

Information security can only be successful if it is seen as an integral part of the day-to-day work responsibilities, and it is therefore necessary that everybody in the organization understands the importance of information security, employees as well as top management. The long-term success of an information security program can only be effective if there is awareness and support throughout the organization.

## What does this mean to you?

At least an annual penetration testing means peace of mind and a reduction of risk to your business, reduced insurance premiums, early detection and prevention of potential attacks. On the other hand a retainer from Suraksha will provide more real time services for your business in conjunction with your own IT department to ensure hacker prevention. In the case of a cloud provider we can give you an independent third party assessment of your providers risk profile.

## What does it cost?

- A typical packaged snap test that lasts 2 weeks would be costed on a fixed price
- A more extensive dig deeper into the areas of vulnerability typically would yield a rich plethora of advice will be priced on the level of threat analysis
- In addition a time and material estimate and quotes can be easily provided

**Place:** Any where in Australia, NZ, Asia and the Middle East

## Who should use these services?

Small to medium businesses large corporations and Governments

## How can I get a quote?
